Education	09/2013 - 07/2019	Gymnasium in der Taus, Backnang
	09/2019 - 07/2022	Gewerbliche Schule Backnang - Technisches Gymnasium, Computer Science Track Abitur (Germany): GPA 1,4 with 764 / 900 credits
	09/2022 - 06/2026	ETH Zürich - BSc Computer Science
	09/2026 - Present	ETH Zürich - MSc Computer Science

Certificates	10/2021	CS50x: CS50's Introduction to Computer Science HarvardX / edX · Online
	06/2019	DELFI certificate B1 Institut français d'Allemagne

Experience	04/2026 - 09/2026	Software Development Intern - Esri R&D Center Zurich Full-time · Zurich, Switzerland · Hybrid Developed a feasibility prototype as part of a graphics development team, coordinating with multiple internal teams and stakeholders.
	12/2023 - Present	Software Engineer - Arbogast Solutions (self-employed) Web development and automation solutions, including a custom solution for a Zurich-based construction business.
	09/2025 - 04/2026	Student Researcher (Bachelor Thesis) - Disney Research Posing meshes in SIM(3) through inverse rendering using torch. Thesis grade: 5.5.

Expertise

Software Development

- Designed and developed a custom automation solution for a client.
- 8+ years of programming through personal projects.
- Highly proficient in JavaScript, TypeScript, Python and C.

Computer Graphics

- multiple small projects using WebGL2 starting in 2020
- WebGPU implementation of FlexLight
- architecture planer using WebGPU

Machine Learning

- Multiple personal projects, university projects and my Bachelor Thesis using numpy, pandas and torch.
- Implemented GPU accelerated MLPs using WebGL and WebGPU.

Linux

- Using Linux as my primary operating system (8+ years)
- Docker
- Managed multiple Linux-VPS instances and websites

Portfolio

FlexLight Engine ([GitHub](#) | [Demo](#))

FlexLight is a web-based fully modular render engine that supports real time Monte-Carlo Pathtracing (using BVHs and importance sampling). The engine uses PBR metallic materials and several approximations grounded in physics to achieve realistic lighting, including caustic effects. It allows obj file imports and supports fully dynamic scenes. Built originally using javascript and WebGL2 and pivoted in 2024 to WebGPU and typescript.

Languages

German	Native
English	C2
French	B1

Skills

- Integrate into teams and adapt to their workflows.
- Work independently and prioritize goals.
- Communicate with clients to clarify needs and expectations.
- Communicate and coordinate independently with stakeholders.

Additional Interests

- member of German party Bündnis 90/Die Grünen, Grüne Jugend
- Head of Sponsoring for VIScon 2026
