Education

09/2013 - 07/2019
09/2019 - 07/2022

Gymnasium in der Taus, Backnang
Gewerbliche Schule Backnang

- Technisches Gymnasium with focus on Computer Science
- Abitur (Germany): GPA 1,4 with 764 / 900 credits

09/2022 - 06/2026
09/2026 - Present

ETH Zürich - BSc Computer Science
ETH Zürich - MSc Computer Science

Certificates

10/2021

06/2019

CS50x: CS50's Introduction to Computer Science
HarvardX / edX · Online
DELFI certificate B1
Institut français d'Allemagne

Experience

04/2026 - 09/2026

12/2023 - Present

09/2025 - 04/2026

Software Development Intern - Esri R&D Center Zurich
Full-time · Zurich, Switzerland · Hybrid
Software Engineer - Arbogast Solutions (self-employed)
Web development and automation solutions, including a custom solution for a Zurich-based construction business.
Student Researcher (Bachelor Thesis) - Disney Research
Posing meshes in SIM(3) through inverse rendering using torch. Thesis grade: 5.5.

Expertise

Web Development

- Designed and developed a custom automation solution for a client.
- Started as a hobby over 6 years ago.
- Highly proficient in javascript/typescript and frameworks: express, next, react, fastapi, etc.

Computer Graphics

- multiple small projects using WebGL2 starting in 2020
- WebGPU implementation of FlexLight
- architecture planer using WebGPU

Machine Learning

- Multiple personal projects, university projects and my Bachelor Thesis using numpy, pandas and torch.
- Implemented GPU accelerated MLPs using WebGL and WebGPU.

Linux

- Using Linux as my primary Operating System (6+ years)
- Docker
- Managed multiple Linux-VPS instances and websites

Portfolio

FlexLight Engine ([GitHub](#) | [Demo](#))

FlexLight is a web-based fully modular render engine that supports real time Monte-Carlo Pathtracing (using BVHs and importance sampling). The engine uses PBR metallic materials and several approximations grounded in physics to achieve realistic lighting, including caustic effects. It allows obj file imports and supports fully dynamic scenes. Built originally using javascript and WebGL2 and pivoted in 2024 to WebGPU and typescript.

Languages

German Native
English C2
French B1

Skills

Web Development js, ts, react, nextjs, fastapi, php
Mobile android, java, dart, flutter
Graphics WebGL, WebGPU, GLSL, WGSL
ML numpy, pandas, torch
DevOps docker, linux, bash, git, nginx

Additional Interests

- member of German party Bündnis 90/Die Grünen, Grüne Jugend
- volunteered to hold and organize children's church for over 3 years
